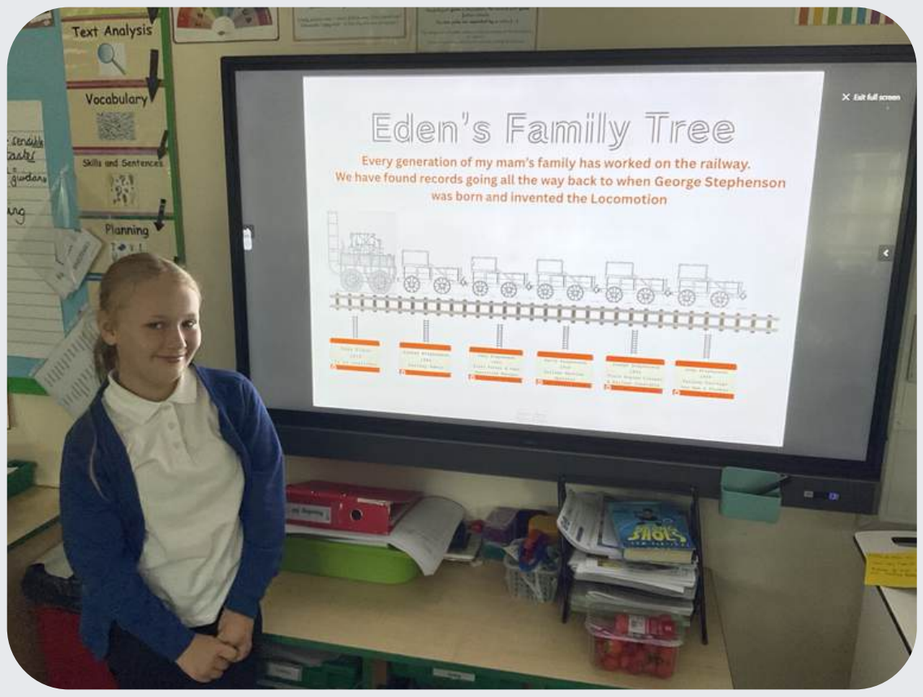
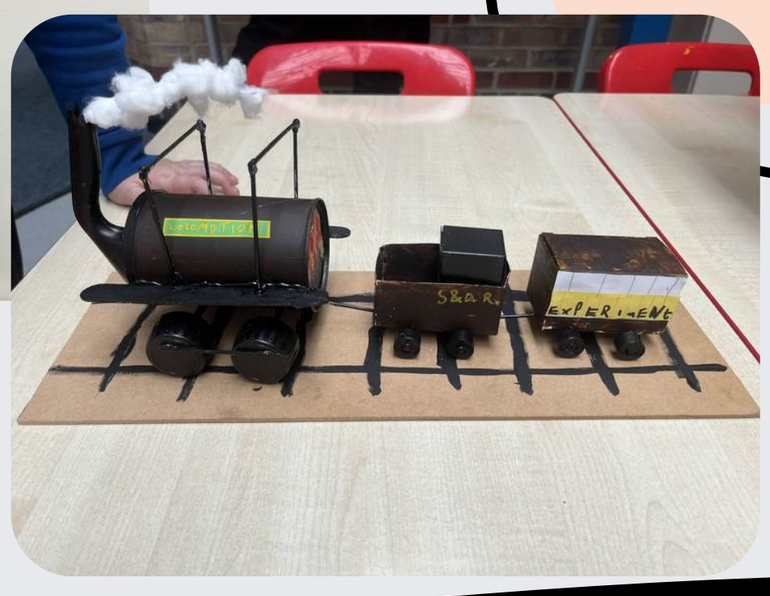
CELEBRATING 200 YEARS OF THE STOCKTON AND DARLINGTON RAILWAY

SPARK EDUCATION TRUST

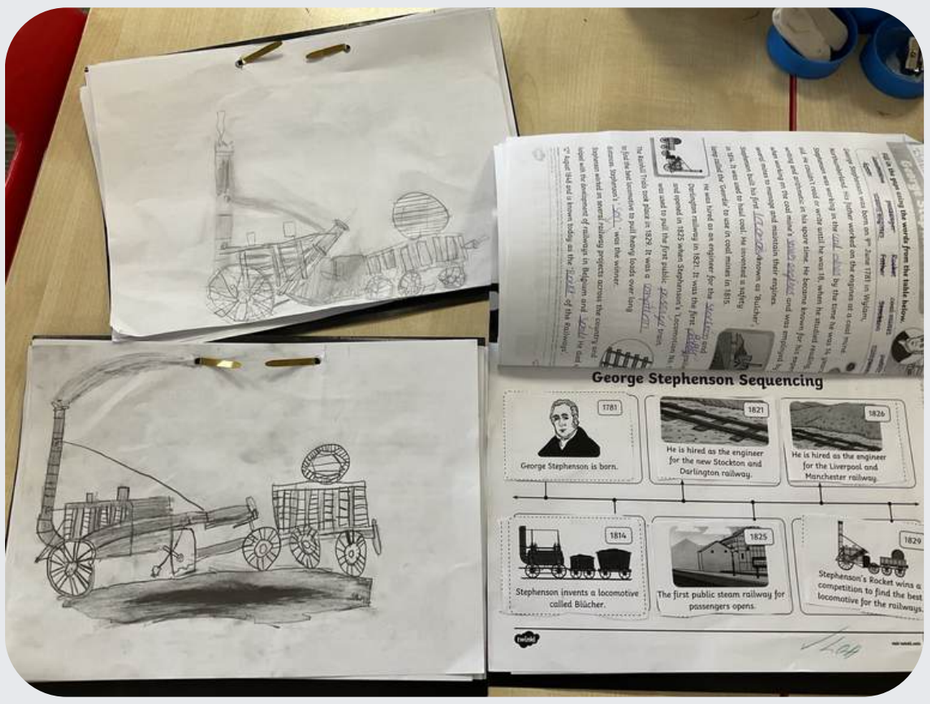


Eden in Year 6 started our celebrations by sharing with her class a range of artefacts from our local railway history. Even more amazingly, Eden shared with us her family history. Her family go back 8 generations of working on the railway. Her Great Grandfather, 8 generations ago, was the great George Stephenson; The Father of Locomotion No. 1. Thank you Eden!

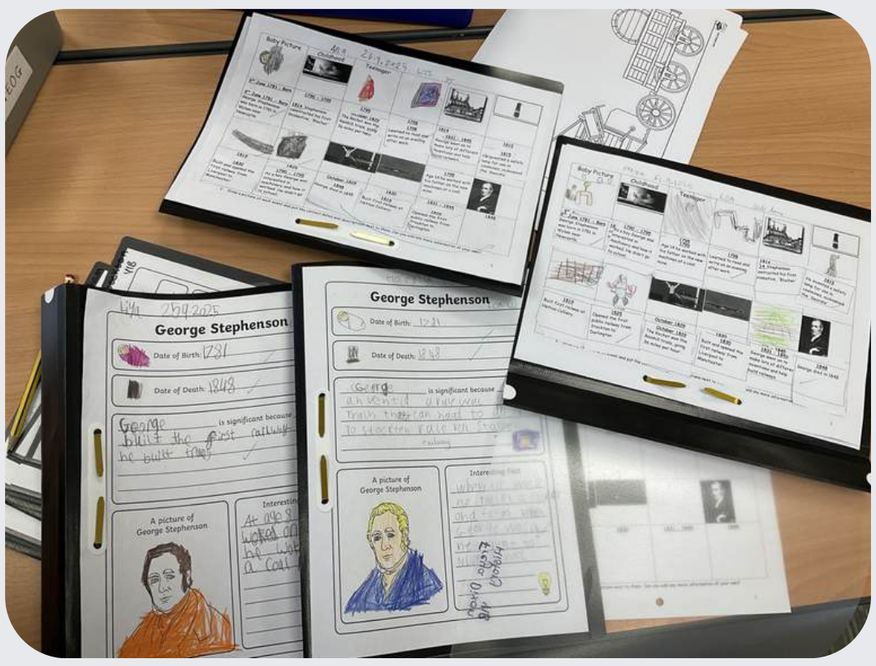
Arthur in Year 2 created a model of Locomotion No.1. This was a wonderfully accurate recreation of an incredibly important moment for our area. Arthur also talked about loving going to see the celebrations. Well done Arthur and thank you for helping to celebrate our local history!



Year 1 looked at the history of the railways and completed observational drawings of a range of locomotives in our nation's railway history. It was fantastic to see the children have their own interpretations of our trains.

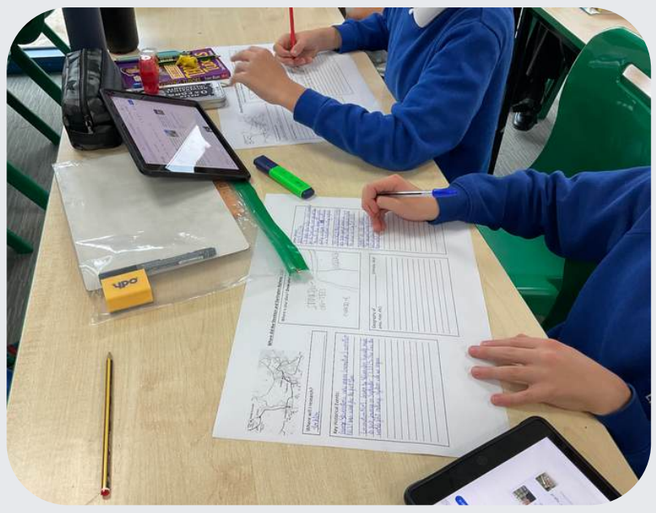


Year 3 completed timelines of the history of the Stockton and Darlington Railway. They then completed their own versions of the Locomotion No.1.



Year 2 worked in their class to also look at the history of the development of the railway. We had some smiley faces!

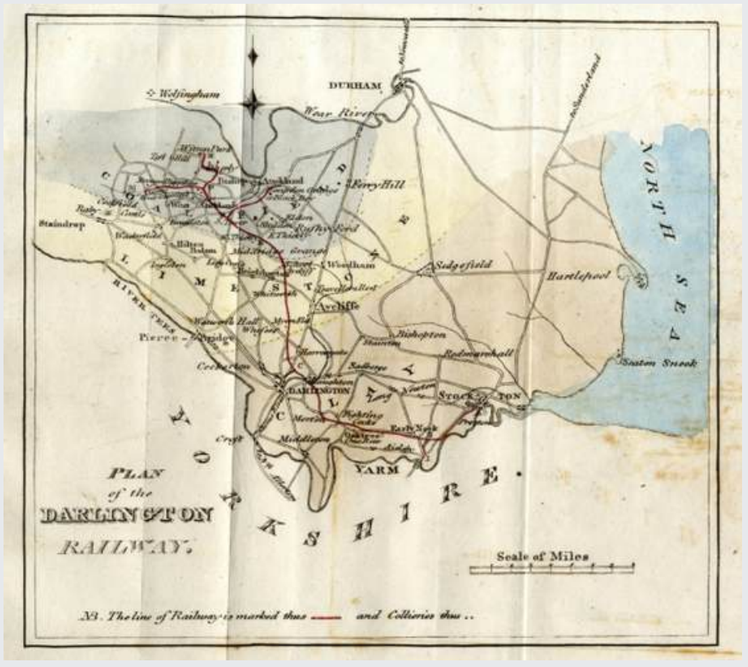
Year 4 looked into old visitors posters for places eventually opened up by the railway. They then created their own



Year 6 looked at the original stops along the line and then researched different areas.

EYFS

Year 5 have a special module this half term looking at the entire history of the Stockton and Darlington Railway. They are our school experts!



Our ship is taking us on a great adventure to the special island!

We need to make a track to get all the way to the bridge.

We are in our jeep and we are going on safari!

This is a pretend train. We are the Elves and she is Santa. We need to get on the train to get to Santa!
